Welcome Baby

Photoshop Actions
by livejoy PHOTOGRAPHY

To Install:

Your download includes a file called WelcomeBabyLJ.atn. Double-click it, and you're done. You'll find "Welcome Baby" actions in the actions palette of your most recent Photoshop version.

If for some reason that doesn't work, you can also:

1 - Open Photoshop.
2 - Make sure your actions palette is visible (Window -> Actions)
3 - From the actions palette menu (in the top-right of the palette), select Load Actions
4 - Navigate to the place you saved the WelcomeBabyLJ.atn file and select it.

Most of the actions will have layer masks for you to customize to your liking! I recommend starting with a soft brush at 100% opacity.

Be sure to Flatten after running any base actions.

If you need some help to get started be sure to watch my Tutorial video here: http://livejoyphotography.com/photoshopactions/

Thank you so much, and ENJOY!
